

# Maximize Data Potential with Interactive Insight Discovery

Explorance Blue® Dashboard: Bringing the power of insight discovery to everyone.

## Enabling Actionable Insights with Data Visualization

The Explorance Blue dashboard is a self-service analytics tool that supports data-driven decision-making at every level of an institution. The dashboard enables institutions to consolidate and analyze feedback data at scale, providing an interactive experience to identify successes and areas of improvement.

Bring your reporting and analytic capabilities to the next level. Whether it's comparing course evaluation results over time or measuring the student lifecycle across multiple touch points, with the Blue Dashboard, any stakeholder can have their own interactive space to discover insights.

## Discover Insights at All Institutional Levels

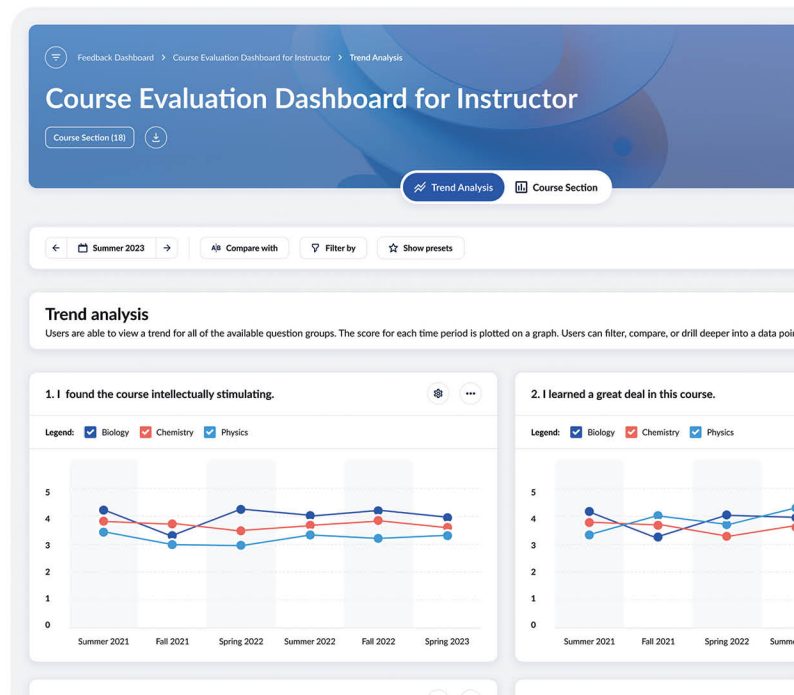

Analyze feedback data with aggregate dashboards at the organizational or per unit level. With flexible drill-down capabilities, stakeholders at all levels can easily explore and make data-driven decisions in a one interactive environment.

- View and compare trend lines to evaluate progression over time (individual, groups, or department).
- Drill down to a subset of the responses collected, including courses, topics, etc.
- View a summary of results grouped by themes and a detailed breakdown by quantitative and qualitative feedback.

## Empower Faculty Success and Self Assessment

Enable instructors to unveil insights from their own feedback data. With a personalized dashboard, instructors can quickly identify successes and blind spots and monitor improvement over time without requesting administrative support.

- Access historical data and identify critical improvement trends.
- View evaluation results for all assigned courses in one centralized place.
- Drill down results based on any approved demographic (gender, age, etc.) from data sources.

# Explorance Blue Dashboard – Key Highlights

## Accessibility

Meet the latest accessibility standards for WCAG 2.1 (AA) and Section 508 to ensure that all stakeholders can access the dashboard regardless of their disabilities and impairments.

## Responsive Design

The dashboard user interface design is automatically rendered to any device (desktop, mobile, tablet, screen reader). The end-user pages are fully responsive for different device types and screen sizes.

## Data Visualization

Visualize data using widgets, charts, tables, and heatmaps for quick insight discovery, or to perform time trend and normative analysis.

## Dynamic Access

Easily set up dynamic role access based on institutional hierarchy so that the right data is accessible by the right stakeholder.

## Data Aggregation and Disaggregation

Slice and dice through evaluation results by leveraging key student and institutional demographics streamlined from existing data sources (SIS, LMS, CRM, etc.).

## Smart Confidentiality

Leverage a smart filter mechanism to automatically protect respondents' confidentiality, allowing users to explore the data designated to them safely.

The screenshot displays the Explorance Blue Dashboard interface. At the top, there is a navigation bar with a 'Course Analysis' button, a date selector for 'Summer 2023', and options for 'Breakdown by', 'Filter by', 'Custom Query', and 'Preset Query'. Below this is a heatmap visualization showing mean scores for 'Instructor question' (4.63/5) and 'Course question' (4.61/5). The main data table lists course sections with their respective response rates and mean scores. A 'Compare with' overlay is visible, showing a search bar and a grid of department and sub-department filters.

Course section (84)	Response Rate	Instructor question Mean (4.63/5)	Course question Mean (4.61/5)
