❖ explorance

All-in-One Survey & Form Platform for Higher Education

Explorance BlueX: Collect real-time insights with intuitive surveys and forms built for researchers, students, faculty, and staff.

Seamless Survey Creation Across the Campus

Whether it's for student feedback, faculty assessments, staff engagement, or academic research, Explorance BlueX helps your institution gather meaningful insights across departments, schools, and disciplines. With a flexible, user-friendly survey tool, anyone on campus can create surveys in minutes.

Academic Research Surveys

Give researchers and graduate students the tools they need to conduct complex studies. Explorance BlueX supports deep customization, advanced logic, and robust data analysis capabilities for academic projects — whether within departments or across interdisciplinary initiatives.
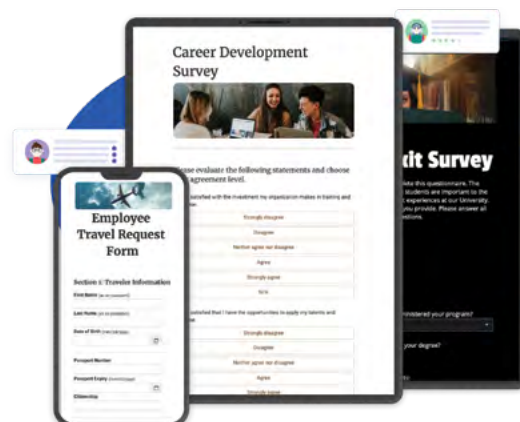

Campus-wide Feedback

Empower surveys and forms across campus — from students to employees. Use it for student services surveys, faculty request forms, employee check-ins, or administrative committees. Explorance BlueX allows for easy customization, ensuring each survey meets the specific needs of departments or administrative units.

Feature Highlights

Free Form Editor

Leverage a drag-and-drop interface with a document-like layout that supports tables, images, and more for easy customization.

Survey Sharing

Easily collaborate with peers by sharing surveys with other users — ensuring consistency and efficiency across projects.
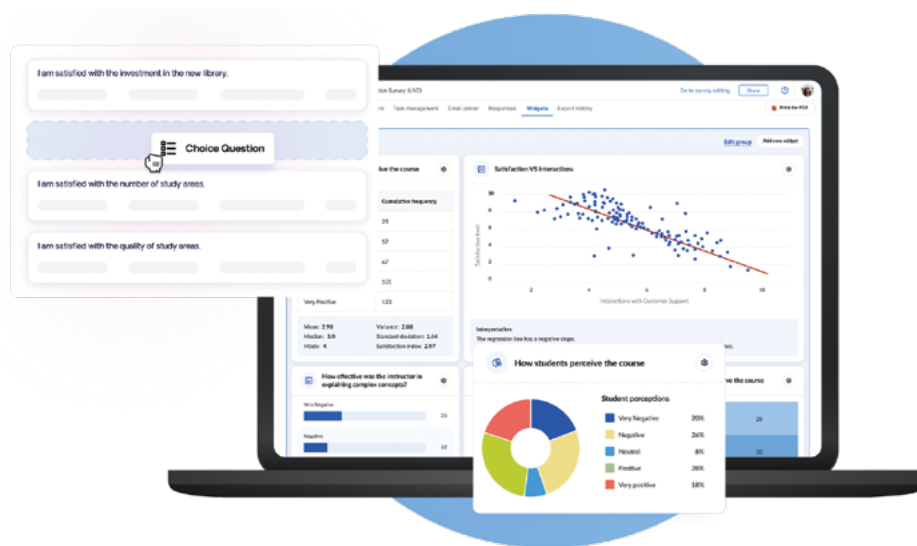

Go Beyond Surveys

Whether you're building request forms, student projects, or interactive in-class content for instructors, Explorance BlueX adapts to your needs with flexible templates and formatting suited for a variety of academic and administrative goals.

Easy Integration

Connect to popular LMS platforms like Blackboard, Brightspace, and Canvas to easily reach your survey audience. Import key demographic and enrollment data from existing sources data including Excel, CSV, LMS, or through API to enable segmented analysis.

Dynamic Question Logic & Design

Build powerful surveys and forms with rich question types, combined with dynamic logic features including branching, piping, and randomization — for a personalized respondent experience.

Built-in Analytics

Visualize survey responses instantly with widget-based dashboards. Create custom views for different roles, from department heads to executive leadership.

Single Sign-On

Connect with your other systems for single sign-on access to unify the experience for survey authors.

Fully Responsive

Reach all users, regardless of device, with surveys that adapt to mobile, tablet, or desktop.
