# Improving Course Evaluation Response Rates: An Explorance and Moodle Integration

Optimizing Feedback Collection Through LMS Integration

Dedicated to enhancing student engagement, Explorance Blue offers the capability to integrate its course evaluations seamlessly into Moodle. This integration aims to provide a more convenient and accessible course evaluation experience for students, faculty, and administrators.

Through the direct embedding of Explorance Blue course evaluations in Moodle, instructors gain the ability to connect with every student within the platform they are already using. This streamlined process allows students to effortlessly view, access, and complete course evaluations without leaving the Moodle portal. Administrators have the flexibility to customize and manage various features, empowering them to enhance response rates effectively.

Maximizing Participation: Creating Multiple Access Points

Leverage LTI 1.3 to easily customize and control various engagement functionalities for each course to promote student engagement and success, while saving time and administrative efforts.

Login Pop-up
When students log in to Moodle, courses with pending evaluations are displayed in a pop-up window.

To-do List
When course evaluations are assigned, they are automatically added to students' to-do list on the user dashboard.

Course Block
Achieve high response rates by activating a course block when there are pending evaluations.

Engaging Faculty in the Course Evaluation Process

Improve faculty engagement in the course evaluation process by allowing them to easily view, monitor, and personalize evaluations to fit the unique needs of their course.

In-app Analytics

Monitor response rates in real-time, drill into summary charts, or view historical reports to understand when to jump in and help drive participation.

Personalization

Streamline faculty course evaluation tasks natively in Brightspace and empower faculty members to tailor specific course evaluation questions for their own teaching and learning goals.

Explorance and Brightspace: A Truly Integrated Partnership

Explorance empowers institutions with next-generation feedback analytics to accelerate the insight-to-action cycle. As a collaborative partner, Explorance and Moodle aligns with institutions fostering a feedback culture, encouraging courageous conversations to drive purpose, impact, and growth.

Explorance Blue fully integrates with the Moodle environment to provide a seamless user experience to amplify user engagement and power data-driven decision-making.

Automating and accelerating success for 25M+ people every day.

Proud to support the world's leading institutions
